Centre, 1301 Quebec Ave.,
Saskatoon, SK S7K 1W7**

RADONX™

The RadonX™ Soil Gas Venting System from IPEX is Canada's first PVC Radon gas piping system. The product line consists of perforated gas collector and venting pipes, fittings, accessories, and solvent cements. Working together as an engineered system. RadonX safely collects and vents soil gas before it enters your home.

AQUARISE™

Backed by decades of experience designing and manufacturing Chlorinated Polyvinyl Chloride (CPVC) solutions, AquaRise™ is an industry-leading potable water piping system for the Canadian market. This innovative potable water system includes hot and cold water AquaRise (SDR 11) and cold water AquaRise (SDR 21)
